Apple. 1.As usual, I found a couple of issues in version 5. . .Q: .NET application refuses to start after Windows 10 upgrade I have developed a.NET application in the past which ran fine on Windows 7 and previous Windows versions. Now that I have upgraded to Windows 10 it refuses to start. There are no errors. I had a process running in the background which runs for a couple of seconds and then terminates. While this is running I open the developer console and get Unhandled exception at 0x77dcc00b (ntdll.dll) in ConsoleApplication1.exe: 0xC0000005: The instruction at 0x77dcc00b referenced memory at 0x0000000000000000. The memory could not be read. I rebooted and that error message still persists. My program never gets past the loading of the DLL (also verified by looking at the callstack in the dev console). What is wrong here and how to fix it? A: Thank you for the answer. I'm certain that the ntdll.dll is the cause of
