And also how to get rid of it? I am really confused and don't know what to do. I tried typing in %appdata%/Local/GitHub/GitHub-App-Toolbox/ to fix the problem, but it didn't work and I don't know if I did it right. Thanks A: I too recently stumbled across this issue, and it seems to be well documented. The error message pops up if GitHub for Windows is updated by the default settings. A fix has already been published in GitHub. You can find it here. Just a simple restart of GitHub for Windows should resolve the error message. Q: Mousemove location of a drag event I have two arrays, one with data that changes position and the other with mouse coordinates. How can I get the mouse coordinates relative to the canvas? I can get the mouse coordinates right now, by using the canvas.getBoundingClientRect() function, I can get the current mouse location, but I don't know how to get the mouse location relative to the canvas. Here is the code I'm using so far:

```
$(document).ready(function () {  
    $("#id01").on("mousedown", function(event){ var mouseX = event.clientX; var mouseY = event.clientY; //init here the list of objects list = [] });  
    $(document).mousemove(function(event){ //get mouse current location mouseX = event.clientX; mouseY = event.clientY; //find the list of objects and find where it's  
        position is, //so I know which is the top and bottom var _topBottom; list.forEach(function(positions, index){ //-2, because the
```
